

Is a Cyber attack in YOUR future?

Stephanie Akerley, CPPO, CPPB, NIGP-CPP, CTPE
Kristy D. Varda, CPPO, CPPB, NIGP-CPP

POLL

Is your entity ready for the next attack?

1. My IT team is on it, and our entity is safe!
2. I'm not sure what we have in place, but I think we are okay.
3. It's just a matter of time before we are the next news headline!

What is a cyber attack?

- Phishing
- Malware
 - Spyware
 - Trojan horses
 - Ransomware
 - Worms
- Data Hacks
- SMShing

Claim Your Tax Refund Online

We identified an error in the calculation of your tax from the last payment, amounting to \$ 419.95. In order for us to return the excess payment, you need to create a e-Refund account after which the funds will be credited to your specified bank account.

Malware

What is cyber security?

Per NIST: The ability to protect or defend the use of cyberspace from cyber attacks.

In reality... making sure your data is safe, secure, and vulnerability resistant.

YES

YOU ARE NEXT!

Is everyone susceptible?

Why is everyone susceptible?

- People
- Out of date infrastructure
- Fear of change

What we do or don't do makes us susceptible!

*Why are cyber attacks becoming more of a problem,
and why is there a recent focus on them?*

What can be done to reduce the vulnerability?

Federal government focus

New initiatives

Changing of laws to allow for
use of federal funds and contracts

Sanctions

Procurement's role in reducing vulnerability

Contracts for:

- Vulnerability Assessment and Penetration Testing (VAPT)
- Keep the Systems Updated
- Complete staff training on cyber security and awareness

How else can we help?

- Hold Cyber Security Awareness Events
- Use Procurement Resources like GovTech Magazine
- [Cyber Security Checklist](#)

POLL

After all is said and done, my entity:

1. could be attacked at any moment, but we have a plan.
2. is better off than I thought, but still vulnerable.
3. needs help fast!

It is not an if situation, it is a when

Right now everyone is at risk - changing behaviors is the most important step in mitigating this risk.

Hackers have been around since the dawn of the Internet, and with that creation the need to develop strategies to combat them grows as our usage grows.
